

Vanderbilt Health and Siemens Healthineers Launch \$87M Value Partnership to Deliver Advanced Technology, Elevate Patient Care

- **Value Partnership will drive technology upgrades and standardization across diagnostic imaging and radiation oncology, promote workforce development**
- **Collaboration will empower healthcare innovation through scalable AI uses in radiology, personalized medicine, and workflow automation**

Vanderbilt Health and Siemens Healthineers have entered into a multi-year, \$87 million Value Partnership¹ to modernize and standardize diagnostic imaging, radiation oncology, and related workforce development programs across Vanderbilt Health's hospitals in the Nashville area. The agreement establishes a strong strategic framework for performance innovation, technology planning, installation support, and service operations, aligning strategy with clinical and operational goals. The relationship will streamline technology for select equipment purchases and upgrades while planned new ventures enhance operations.

"Our mission is to continually provide patients first access to the very latest advancements," said Jane Freedman MD, deputy chief executive officer and chief health system officer for Vanderbilt Health. "Joining with Siemens Healthineers, a world leader in healthcare equipment, will help our health system remain on the cutting edge regarding imaging technology implementation while also offering access to their other innovations."

Vanderbilt Health and Siemens Healthineers will also explore opportunities involving data infrastructure, AI-enabled technologies and workflow innovation in radiology and personalized medicine. These efforts are intended to support clinical teams, improve operational efficiency, and develop care models for wider application.

Under the agreement, Siemens Healthineers will provide advanced technology for magnetic resonance imaging, computed tomography, molecular imaging, interventional radiology and radiation oncology systems for Vanderbilt Health locations including University Hospital and Monroe Carell Jr. Children's Hospital at Vanderbilt. The Value Partnership is intended to strengthen Vanderbilt Health's patient-centered approach to personalized care delivery, enhance the patient experience and further efforts to improve health outcomes for communities across Middle Tennessee.

"Vanderbilt Health is known for its clinical excellence, research leadership and commitment to patient-centered care," said John Kowal, president and head of the Americas at Siemens Healthineers. "We are proud to support them with advanced imaging and radiation oncology technology, operational expertise and a framework for innovation that can help improve care delivery today and anticipate the needs of tomorrow."

¹ Value Partnerships are long-term and comprehensive partnerships between Siemens Healthineers and healthcare providers, enabling them to create more value to better treat patients and reduce operational complexity.

Vanderbilt Health (VH) is a growing academic health system anchored by Vanderbilt University Medical Center in Nashville, Tenn. It is one of the largest and most prominent academic systems in the Southeast, providing patient care, conducting research and training the next generation of

health professionals. A major driver of the local economy, Vanderbilt contributes \$22.13 billion to the regional economy and more than \$1 billion in total community investment through patient financial assistance, medical research and medical education. Home to one of the nation's busiest critical care centers, VH offers the region's only Level I Trauma and Burn Centers for adults and children and Middle Tennessee's only Level IV Neonatal Intensive Care Unit. As the Mid-South's largest provider of specialty care, VH is also home to the region's largest medical group practice and Tennessee's only NCI-designated Comprehensive Cancer Center for adults and children. An epicenter for biomedical research, VH receives over \$1 billion in annual research awards from government, industry, foundations and donors and is among the nation's top 10 recipients of National Institutes of Health funding. VH is also home to the nation's largest health system DNA biobank, BioVU, with more than 350,000 human DNA samples used for pharmaceutical discovery and to advance clinical knowledge. VH is the largest non-governmental employer of Middle Tennesseans, with 43,000 employees, including 5,000 employed clinicians.
