

### Siemens Healthineers and Cleveland Clinic Launch 10-year Strategic Alliance to Enhance Care Through Clinical Innovation and Advanced Imaging

Siemens Healthineers and Cleveland Clinic are expanding their 35-year relationship through a new 10-year, strategic alliance designed to foster clinical and workflow innovation that further enhances patient care and operational efficiency across the health system's locations. Through this strategic alliance, the organizations will work together to build on Cleveland Clinic's leadership in diagnostic imaging, cardiology and radiation oncology, provide clinical teams with innovative tools and advanced training, and create a more personalized experience for patients.

Under the strategic alliance, Siemens Healthineers will provide multiple diagnostic imaging and therapeutic technologies to Cleveland Clinic, including magnetic resonance imaging, computed tomography, radiation oncology, interventional radiology, and X-ray. In addition, Siemens Healthineers will expand its existing team of more than 30 employees dedicated to supporting Cleveland Clinic. The on-site presence will include technicians and training personnel, including expertise to support Cleveland Clinic's development of a theranostics cancer-treatment program, an emerging approach that combines targeted imaging and therapy to personalize cancer care.

"This strategic alliance with Siemens Healthineers will help us bring more consistent, connected and advanced imaging and treatment services to our patients," said Peter Liu, M.D., Chair of Enterprise Imaging at Cleveland Clinic. "By aligning technology, service and clinical support more closely across our global health system, we can improve access, increase efficiency and create a better experience for patients. This collaboration builds on a strong foundation and positions us to continue innovating for the benefit of our patients and communities."

Added John Kowal, president and head of the Americas at Siemens Healthineers: "Through our longstanding relationship with Cleveland Clinic we have achieved important advances in the diagnosis and

treatment of serious disease resulting from more than 100 research projects and 70 peer reviewed publications. We look forward to many more years of innovation and continued positive impact on patient care.”

Additional areas of collaboration include supporting establishment of Cleveland Clinic as a Center of Excellence for MRI technologist education, including providing expertise in ongoing clinical education, protocol optimization, technologist skill development, radiation-safety education, and support for physicians in expanding the use of CT into cardiology, radiation therapy and image-guided procedures.

The strategic alliance is also expected to create opportunities for research, education, workforce development, and a foundation for innovation in the integration of intelligent software and automation into imaging workflows. Siemens Healthineers and Cleveland Clinic are also exploring future initiatives focused on biomedical engineering training and clinical education geared toward workforce development, both at Cleveland Clinic and in the greater Cleveland region. The alliance will also contribute to broader economic development through investment in Cleveland Clinic’s Main Campus, job creation and continued growth in the Cleveland Innovation District.

Joint Press Release  
**Siemens Healthineers and Cleveland Clinic**

[Cleveland Clinic](#) is a nonprofit multi-specialty academic medical center that integrates clinical and hospital care with research and education. Founded in 1921 by four renowned physicians with a vision of providing outstanding patient care based upon the principles of cooperation, compassion and innovation, Cleveland Clinic has pioneered many [medical breakthroughs](#), including coronary artery bypass surgery and the first face transplant in the United States. Cleveland Clinic is consistently recognized in the U.S. and throughout the world for its expertise and care. Among Cleveland Clinic's 83,000 employees worldwide are more than 6,600 salaried physicians and researchers, and 21,900 registered nurses and advanced practice providers, representing 140 medical specialties and subspecialties. Cleveland Clinic is a 6,725-bed health system that includes a 173-acre main campus near downtown Cleveland, 23 hospitals, 300 outpatient facilities, including locations in northeast Ohio; Florida; Las Vegas, Nevada; Toronto, Canada; Abu Dhabi, UAE; and London, England. In 2025, there were 15.9 million outpatient encounters, 343,000 hospital admissions and observations, and 336,000 surgeries and procedures throughout Cleveland Clinic's health system.
