

Siemens Healthineers, Prisma Health Expand Value Partnership with \$50 Million Investment in Radiation Therapy

- **Multi-year technology and services investment in cancer care**
- **Builds on an existing Value Partnership**
- **Includes adaptive radiotherapy, clinical and operational support for oncology**

Siemens Healthineers and Prisma Health, based in Greenville, USA, are expanding their Value Partnership¹ to help elevate the standard of cancer care in South Carolina and Tennessee. Prisma Health's \$50 million investment includes the acquisition of the Ethos adaptive radiotherapy system from Varian, a Siemens Healthineers company. Adaptive radiotherapy provides cancer patients with more precise and personalized care through AI-driven treatment and planning processes that adapt to tumor and anatomical changes in real time to protect healthy tissue.

In 2021, Siemens Healthineers and Prisma Health entered into a 10-year [Value Partnership](#) to improve care, promote innovation, and develop the local workforce. The expanded relationship will integrate next-generation technology and specialized clinical oncology and professional services, new tools and time-saving workflows. The goal of the Value Partnership is to advance more personalized, efficient, and accessible care for the communities Prisma Health serves.

"Since entering into the Value Partnership with Siemens Healthineers, Prisma Health has expanded access to imaging services and introduced new technologies and care locations to better serve our communities," said Clarence Sevillian, executive vice president and chief operating officer of Prisma Health. "Our priority is ensuring that patients have access to care that is both compassionate and informed by the latest clinical insights. This next phase of the partnership reflects a continued spirit of collaboration, integrating advanced oncology tools and support services that may help streamline operations and enhance the patient experience."

Added John Kowal, president and head of the Americas at Siemens Healthineers: “Working with Prisma Health to establish a full continuum of cancer care—from screening and diagnosis through survivorship—is an enormous point of pride for our organization. Combining the power of diagnostic imaging, radiation therapy, and post-treatment monitoring with professional services to manage complex oncology operations helps to ensure that advances in patient care are consistent and sustainable over time.”

¹ Value Partnerships are long-term and comprehensive partnerships between Siemens Healthineers and healthcare providers, enabling them to create more value to better treat patients and reduce operational complexity. They combine each healthcare provider’s know-how and strategic goals with the technologies, innovations and industry expertise of Siemens Healthineers to address pressing challenges such as workforce and budgetary constraints and enhancing healthcare access in underserved communities.
